

Amendments to the Specification

Please replace paragraph [0020] with the following amended paragraph:

[0020] Data stored in database 216 is periodically transmitted to a server with an associated database over wind farm network 200. In one embodiment, the various databases interact via the Open Database Connectivity (ODBC) application program interface (API); however, other interfaces could also be used. Various versions of the ODBC Manager are available from Microsoft Corporation of Redmond, Washington.
